

# KODAK FLEXCEL NX System

## Exciting New Developments for Corrugated Packaging

Brand new extensions to the **Flexcel** NX System bring all the benefits of this award-winning Kodak technology to the post-print and pre-print corrugated markets.

### Kodak Flexcel NX Wide 5080 System

**Kodak Flexcel** NXC Plates for post-print applications

**Kodak Flexcel** NXH Plates for pre-print applications

The **Flexcel** NX System has earned a reputation for driving outstanding quality at the lowest total delivered cost in labels, flexibles, shrink sleeves, cartons and bags. Corrugated box production can now enjoy those business-enhancing benefits with a tailored solution built on the same unique **Kodak SQUAREspot** Imaging and **Kodak DigiCap** NX Patterning technologies that set Kodak solutions apart from the rest of the field.

### Features and benefits:

- Full tonal range with low dot gain
- Reduced fluting with excellent ink coverage and lower impression
- Consistent color
- Superior performance on lower quality boards and liners
- Higher line screens with existing anilox
- Excellent plate life
- Benefits for line, tone and full process color work

**MORE** SHELF IMPACT,  
**LESS** TOTAL DELIVERED COST

The **Kodak Flexcel** NX System for corrugated packaging delivers print excellence with the elegance and simplicity that Kodak flexographic solutions have become known for. Simplicity on press. Simplicity in prepress. Simplicity drives efficiency, and efficiency drives profits.

**MORE** PROFIT POTENTIAL,  
**LESS** COMPLEXITY

The **Flexcel** NX Wide 5080 System includes a brand new imaging platform and laminator, and enables plate making in formats up to 50" x 80." Designed for operator ease of use, rapid imaging and robust performance, the imager features tried-and-trusted **Kodak SQUAREspot** Imaging technology for precise, repeatable, high-resolution imaging.

The **Flexcel** NXC Plate has been formulated specifically for post-print corrugated applications, and delivers superior ink coverage, image reproduction and cost-effective on-press performance.

The **Flexcel** NXH Plate is ideal for high quality pre-print applications, enabling efficient on-press performance, long plate life, and print quality that competes head-on with litho labels.

Make the shift to a corrugated solution from Kodak and set your business apart from your competition.

**SHIFT** TO MORE, WITH LESS
